

**Corporate Policy  
on Food Quality and Safety  
of "TALAR FOODS" Ltd.**

We, the Senior Management of "TALAR FOODS" Ltd., hereby undertake to apply and constantly update the present Policy on Food Quality and Safety, based on the requirements of the ISO 9001 "Quality Management Systems. Requirements" and IFS Food "Standard for auditing quality and safety of foods" and declare our commitment and responsibility for development of the quality and safety of the processed, manufactured and traded products.

The main purpose of the Policy on Food Quality and Safety of the company is

***Satisfying the customer requirements and applicable regulations concerning food quality and safety and taking care for constant improvement.***

In support of the strategic direction of "TALAR FOODS" Ltd. and for implementing the Policy and the main purpose we will strive for:

- Achieving sustainability through effective functioning of the Management System compliant to the ISO 9001 and IFS Food standards;
- Ensuring the scope and contents of the Management System appropriate to our products and activities consistent with our role in the food chain, the organizational context, the needs and expectations of the stakeholders;
- Protecting the environment and striving to avoid its contamination as a result of our activity;
- Setting of reasonable, attainable and economically secured aims and tasks on food quality and safety in each structural unit as an element of the organizational processes for ensuring product requirements, including food safety, quality, legality, specification and carrying out of inspections;
- Meeting the obligations for compliance and satisfaction of applicable regulations pertaining to our risks and capabilities, quality and safety of offered products;
- Ensuring the awareness of customers and partners, including the persons working for or on behalf of the organization on the matters of food quality and safety, achieving staff ethics and responsibility and understanding of the environmental aspects of the particular production activities;
- Providing information and discussing with stakeholders of the problems with food quality and safety and the efforts involved in their improvement;
- Striving for sustainability and constant improvement of the food quality and safety through carrying out systematic checks and applying corrective and preventive actions;
- Assessing the effectiveness and applicability of our Policy through periodic reviews by the management.

We undertake to steadfastly implement our Policy on Food Quality and Safety and to meet the requirements of the documents within the Management System as an obligation and responsibility of all partners in the company regardless of their position.

We are convinced that the entire staff clearly recognizes the role of food quality and safety and we are confident that everyone, according to his or her rights and responsibilities, will contribute to continuous improvement of the efficacy of the Management System.

We declare our personal participation and responsibility for publishing, understanding, application and maintaining the adequacy of the announced Policy on all levels of the organization.

The Policy is available to the general public and all stakeholders on [www.talarfoods.com](http://www.talarfoods.com).
